Seven Things to Know About SCHERMO

From the problem we saw during the pandemic to the numbers behind the business.

01

The Problem

Home-workout injuries on the rise

02

The Product

A smart mirror that corrects your form

03

The Market

Who SCHERMO is built for, and how big

04

The Business Model

B2C and B2B, side by side

05

The Competition

Where SCHERMO stands on price

06

The Financials

Costs, pricing, and break-even

07

The Investment

What it takes, and the return

THE PROBLEM

Home Fitness Grew Faster Than Guidance

COVID-19 pushed millions of people to train at home — following influencers and apps with no professional oversight. The result: a spike in avoidable injuries among adults.

Source: Candela (2020), Revista Colombiana de Rehabilitación

WHO (2020)

Physical inactivity is the 4th leading risk factor for global mortality.

Unsupervised training isn't a niche problem — it's a public-health-scale gap, and it's exactly where SCHERMO steps in.

Many of these routines are copied from social media "influencers" without pedagogical oversight — organized for mass appeal, not individual safety.

A Mirror That Watches Your Form

Concept reference: motion-tracked home training

1

Watch

A camera built on Microsoft's Kinect Sensor Bar reads the user's body position in real time.

2

Correct

If the posture is off, the mirror shows the right position instantly — before an injury happens.

3

Log

Every session is recorded in the companion app, building a history of progress over time.

Exercise positions are validated against specifications built with Medsport, sports-medicine specialists — not guesswork.

WHAT MAKES US DIFFERENT

Not Another Class to Follow

Countless apps already stream a trainer's routine for users to copy. SCHERMO does the opposite: it's a corrector, not a class.

Typical fitness apps

Stream a trainer's video. The user follows along, at the app's pace, doing whatever routine is shown.

SCHERMO

Analyzes the user's own movement and corrects form in real time — the user decides what to do, when, and how.

An incremental innovation in training method, and a product innovation in how it's delivered.

Beyond the Mirror: The App

The mirror corrects form in the moment. The app turns every session into a bigger picture of the user's health.

1

Nutrition plans
Guidance tailored to the user's goals and progress

2

Exercise guides
Step-by-step reference for correct technique

3

Custom routines
The user builds their own training plan

4

Progress tracking
Quantitative history of every session

BODY METRICS TRACKED IN-APP

Weight

Body fat %

Muscle mass %

Visceral fat

Basal metabolism

Digital agency and development partner

Filtering Down to Our True Market

Starting from Colombia's four largest cities, we filter step by step to the people SCHERMO is built for.

Final target: ~609,449 people — a market density of 5.97%. Figures represent number of people.

Who We're Building For

TARGET PROFILE

- **Generation**
Millennials & Gen Z, ages 30–39
- **Income**
Earning 3+ Colombian minimum wages
- **Location**
Bogotá, Medellín, Cali & Barranquilla
- **Behavior**
Already exercising at home with tech tools

WHAT THEY VALUE

49%

will pay to
save time

85%

are willing to
try new
products

61%

spend on
experiences,
not things

62%

want
personalized
products

45%

will interact
with
innovative
products

Two Ways In: B2C and B2B

B2C

Direct to Consumer

Individual households buy the SCHERMO smart mirror and subscribe to the companion app — the core product experience, sold directly to the people who use it every day.

Consultative marketing: guiding each customer to the right routine, not just the sale.

B2B

Gym Chain Partnerships

Colombia's five largest gym chains — Smart Fit, Bodytech, Stark Smart Gym, Spinning Center Gym, and Action Fitness — count 1,750,000 affiliated members between them.

SCHERMO's initial goal: a 5% share of that affiliated base.

-priced for the Market We Chose

SCHERMO has no direct competitor in Colombia — but adjacent smart-mirror products show just how much room there is on price.

64%

less expensive than LifeSmart Colombia, the closest entertainment-oriented smart mirror on the market.

LifeSmart's mirror is built for entertainment, not correction — and priced well above what our target market is ready to pay.

What Each Sale Is Worth

\$3,132,044

Unit price (COP), year 1

\$722,779

Profit per mirror sold (COP)

\$30,000

Monthly app subscription (COP)

20

Mirrors sold per month, launch

MONTH ONE, YEAR ONE

\$62,640,892 COP

in initial monthly hardware revenue, plus \$600,000 COP in subscription revenue from those same first customers.

Both price and cost are modeled to grow 3% per year, in line with inflation, as revenue scales.

Costs, and the Point We Turn a Profit

Monthly Cost Structure (COP)

Variable = hardware, Kinect sensor bar, software production · Fixed = rent, website, non-production salaries, utilities

TOTAL MONTHLY COST FUNCTION

\$117,536,962 COP

Production cost of \$2,409,265 COP per unit

BREAK-EVEN POINT

93 mirrors

sold per month — the target for month 1 of year 1.

How the Launch Gets Funded

INITIAL CASH REQUIREMENT

\$180,687,500 COP

- **Equity from 4 partners**

\$120,000,000 — \$30,000,000 each

- **Bank loan, Bancolombia**

\$60,687,500 over 5 years, \$19,169,663/yr

CAPEX \$270,687,500 · OPEX \$3,278,453

A PARTNER, NOT JUST AN INVESTOR

Software development was originally the single largest cost at \$200,000,000 COP.

Zaga, our development partner, joined as an equity shareholder instead — contributing engineering talent rather than cash.

\$90,000,000 COP saved

Software investment cut from \$200M to \$110M COP

THE INVESTMENT

The Numbers Behind the Bet

0.51

Debt-to-equity ratio — healthy, not over-leveraged

25%

Ke — cost of equity capital

20.7%

WACC — weighted average cost of capital

27%

IRR — projected internal rate of return

NET PRESENT VALUE

\$127,093,403

Colombian pesos, over the 5-year projection

YEAR 5 NET PROFIT

\$965,919,150

After recovering early losses, at an incremental growth rate

***“LOOK IN THE MIRROR AND
START THE CHALLENGE.”***
